

One month school program in Denmark

March, September and November 2019

AFS in Denmark is pleased to invite students (aged 15 - 18) to spend one month at a Danish "EFTERSKOLE" exploring cultural differences, learning Danish and English, enjoying in-depth leisure activities, spending a weekend in a Danish host family and in general experience daily life at a Danish International efterskole.

A little about the Danish "Efterskole" concept

In Denmark there is a special type of residential school offering young people the possibility to complete 10th grade in a "live-in and learn" school - in an exciting and safe environment which provides the young people with the opportunity to self develop, mature and to get new angles and inspiration regarding their future study and career.

AFS Denmark is offering this intensive school program in collaboration with one such school, the "Ranum Efterskole College"

Ranum Efterskole College- the hosting school

Throughout the program the participants will live, eat and study at the Ranum Efterskole College.

Ranum Efterskole College is a large residential school which is situated in the country-side approx. one hour's drive from the city of Aalborg and 4 hours' drive from Copenhagen.

The school itself offers a dynamic and socially developing environment with social, creative and sports activities being organized for students in their spare time and weekends. The area of the school is very peaceful and safe and the students are free to leave the school grounds in their spare time (during day time) to go to the adjoining village or surrounding areas.

You can read more about the Ranum Efterskole College at www.ranumefterskolecollege.com

Program highlights

- Four weeks at Ranum Efterskole College being a student in the international class
- Living and studying alongside the Danish students at the school
- Doing exciting extracurricular activities in the spare time
- Homestay with a Danish host family

This is an individual program where you will follow a student of the international line and in that way experience daily life and classes at a Danish efterskole.

Program description and learning aspects

- By studying at a Danish school together with Danish and international students, the AFS participants will learn about **Danish culture and language** and develop their **intercultural competencies**.
- They will take part in the classes of the international line which are conducted in English and in that way strengthen their **English language abilities**.
- They will participate in various **recreational activities such as music, dance, sports, etc.**
- The AFS participants will board in 3-6-person rooms together with Danish students on the international line and also study together with them. In that way they will have **close contact to Danish students**.
- The AFS participants will have a short **homestay** with a Danish host family.
- During their stay at the school, the AFS participants will be part of the **vibrant social life** at the school and interact with Danish and international students also staying at the school.
- The guests will participate in various excursions and other social activities during vacant weekends and evenings.
- At the end of the program an **end-of-stay evaluation** will be organized.
- Participants will receive a **certificate of participation** from Ranum Efterskole College with full details of the program curriculum.
- Participants will also receive a **certificate from AFS Denmark**.

Participant requirements

Participants should:

- be motivated to go abroad and open to new experiences
- as a minimum have basic English skills
- be aged between 15 and 18 years
